# Flexi-Seal

for a perfect, watertight finish.

Flexi-Seal fits between the edge of the tray and any abutting wall. It provides a flexible seal behind the tiles or wall panels avoiding any issues caused by potential grout or silicone failure.

Flexi-Seal uses a combination of durable flexible rubber with a waterproof butyl based adhesive to give maximum protection where the shower tray meets the wall.

As the rubber is flexible, it will maintain a watertight seal whilst allowing for a certain amount of movement that is inevitable, particularly in new builds.
